HR Excellence in Researchyear Report 2023

Introduction and Background

Lancaster is a researchtensive institution In REF202 1,1% of our researchwasindependently rated as 'world leading' or internationally excellent including 46% rated in the highest category of the take pride in our research environmentand99% of Lancaster's overall research environmentant world-leading or internationally excelled. This includes areas such as research support, training facilities. We are still growing in scalewith 50% more staff submitted in 2021 than in 2014. This increase in research activity hasrefocussed attention and resource on the cultural elements of the research environmentant Research Culture Manager being appointed 2023 and the introduction of a new Research Culture Working Group focussing on specific areas for improvement.

Lancaster University first received the European HR Excellence in Research Award (HR EiR) in 2011. Since the 2021 year-10 submission and collowing the challenges of COVID19 with the need to support all staff with remote working, there has been a period of continuous change ancaster was quick to respond when switching to online delivery of all stade velopme 10.6 (v1(e)401 Tw [(b)-0.8 Tc(d)-0.7 (4(li)3 (c)-1.9.J1)vi0.6 (w)8000 cm.

CIG work closely with the Athena Swamplementation Goup (ASIG) o ensure the two action plans have similar themes, this has now been expanded to also include the EDI institutional phates completed, the Race Equality Charter Caction plan.

The Research Culture Working Groestablished in 2023s lookingto be formally accepted into university governance by becoming a subcommittee of Research Committee 3/2202This newWorking Groupwill be chaired by the academic lead for research cultureth a representative membership including researchonly staff. It will oversee all elements of research culturething with other relevant committees such as EDI, Ethics and Integrity, Open Research and the CIG. It willeintatigatend finish groups to undertake detailed analysis and design action plans to treats areas of research culture that could be further developed in line with the institutional research culture statement and action plan which will be developed in 2024.

Researcher voice

As well as being active members of CMe, Research aff Association (RSA) hosts themed events once a term, allowing for direct in person communication with the broader researcher community. This real so a researcher group in the faculty of health and medicin with members itting on several committees.

Regular newsletters are circulated directly to all research staffping them up to date with development opportunities these are in addition to local departmental and faculty communications. Researchers are reporting that communication with the departments previously an area of concernas improved in the last two years Researchers new to the institution are invited to a bespoke researcher induction and site and encouraged to join the RSAA or the Faculty Researcher representative groups.

Lancaster undertakes CEDAR surveys annually to keep the flow of feedback current and refiewant turn directly informs the action plan and open discussions as part of the RSA events series.

EvaluatiorProcess

To build on the data collected as part of the 2021 CEDAR Survey, Lancaster ran its own internal CEDAR survey in 2022 and followed this with several focus groups and onto-one interviews. A researcher culture report was commissioned with QR funding hich highlighted some of the key issues researchers were experiencing this was undertaken by a Lancaster researcher who ran focus groups with researchers and research managerand others in support roles heseissues were agreed with the RSAs being of importance to them and informed everalnew shortterm priority actions these included Equity – Consistency in application of policies around funding for conference leater process and Research staff hereirority for development funding inaculty of Health and Medicine (FHM) this is being held as good practice to be encouraged across the faculties.

Researcher Voice/inclusion – Inclusion of research staff in all communications this is now reported by our researchers at our focus groups, as having improved across the institution.

Identity – Agreed nomenclature use of the term research staff (instead of ECR, Post Docieto) we embedded in most areas

New development module and training postWe have procured digital training modules for research integrity, impact, safeguarding, trusted research and etties and other training and skills will be supported by a new Training and Skills development post currently under recruit in the stability to fully embed our investment in researcher and research manager training

Research Culture manag fo ensure that the developmentrel6 (u)2.3 (lt)-3 (u)2 (d)2. (d)22 (e d)pthththee1nde d

support hybridevents and whibitions using visual and multimedia research outputs. This investment has allowed us to grow our existing collaborative events such as Data Conversations and Open Reséarch Caf which allow researchers to explore numerous aspects of research culture. It will help us to realise our vision of an interdisciplinary incubator where researchers from different disciplines can connect, embedding collaboration and collegiality into the research culturese spaces have also hosted with Lancaster's partner institutions and other external HE, again developing networks for the researcher population. Still in the early stages, numbattending events and using the space has increase, but more importantly the new space as a distinct identity, and it provides researchers with their own space, that is welcoming and inspiring, and prompts them to collaborate and think differently about their research and has become the 'unofficial home of cross disciplinary research and open research'

Employment

All researchonly staffhave been moved töindefinite with anend date contracts—giving full employment rights and access to enhanced redeployment opportunities. This has been a bitterextient as it does mean that some researchers are now not eligibolapply for some 'contract researcher' grants dit has not been welcomed by all research staff. Contracts still time limited resulting in job insecurity of some cause concern fortaff. On a positive note, all new grants (where applicable) should have promotional costs built in, allowing researchers opportunities to apply foromotion.

Professional and Caredevelopment

Lancaster continues to run a full range of supportigrammes for research staff at all career stagletiese include:a bespoke Introduction to Research at Lancaster for all new researcherss institution mid career researcher mentoring schembeunched following pilot last year (and featured at the Vitae conference); and a range of research leadership and management workshippsirect response to feedback from the RSAupweeklongevent 'Preparing for Promotion' features research only pathway case studies and processes and balances the Prosper project, white books at careers beyond academia (Lancaster partnered with Liverpool and Manchester in producing this portal and support programme, which is now widely available tall institutions).

Theseprogrammesare in addition to research skills training, developed by the Library and the Research ServicesOffice, media and engagement supposend teaching support options we now have a broad range of online tools available for research managers including a change and uncertainty toolkit.

This year Lancaster has introduced a new tracking system, allowing rchers to request to use some of their 10-day development allocation, linked to their professional career conversation as part of the Performance Development Revier (R) process The system will capture the number of days used and breakdown of the type of development activity undertaken A web page offersugidance researchers and managers to the types of development activity that is appropriate, making it clear that this is in addition to role-specific training.

3-yearkey objectives

Improve researcher voice and representation increaseresearch staff engagement with formal feedbackprocesses.

- x A set of guidelines to be drawn up add clarity and aid with recruitment to the role of researcher representativeson formal committees Currently no formal feedback/feedforward reporting process is in place, and there are no role outlines or recruitment guidelines.
- x New research culture workshops and planned thematic culture cafes will increase direct access to researchers.
- x New Faculty based Researcher, Career and Development groups to be formed using the pilot group from FHM as good practice. This will allow Faculties to communicate directly with their own

research staff and offer broader opportunities for loc development interventions.

x Faculty RCAD chairs to sit on CIG to feed into

| to be a powerful tool in achieving cultural change across the EDI agendaStaff time will be saved and a cohesive message across all reports and submissions. Actions completed be |
|--|
| celebrated Institution wide. |
